RIMAGE MEDICAL DISC DEVICE™ 2450

Powerful In-house Solution Delivering Quality Results

The MDD 2450 system is a high-performance, front-office solution for automated Patient CD/DVD Production. Your Medical Imaging workflow will benefit from a fully automated and intelligent in-house robotic solution with a low long-term cost of ownership.

Benefits

Affordable
The MDD 2450 is the most affordable disc publishing system with a thermal printer. It is the easiest way to get Rimage quality publishing in an affordable package. All you need is a PC, the solution software and you are ready to go.

Network connectivity
The standalone MDD 2450 system can be easily networked using an external PC.

Dust cover
With the help of the new ventilation filters, dust contamination in the device is reduced.

Integrated printer
Rimage's Everest® Encore 400 printer is the market's only fully integrated thermal retransfer printer, providing indelible, high-resolution images and sharp, easy-to-read text. Unlike inkjet printing, thermal reftransfer printed labels will not scratch, smear, peel or fade over time.

Unmatched performance
The three-bin carousel with optional 50-disc output bin enables multiple patient discs and media types to run concurrently. Publish up to 50 CD-Rs, DVD-Rs, or Blu-ray Discs™ per hour with hands-free operation.

Features

Backed by decades of experience in designing and building hardware, the MDD 2450 standard features include:

- Integrated DiscWatch™ status light
- Two quick-release front-swappable recorders
- LCD status display
- Rotating three-bin 150-disc carousel for input/output
- External five-disc output bin
- Integrated Everest Encore 400 thermal retransfer printer
- Internal lighting
- USB 3.1 Gen 1

Options

- Blu-ray recorders
- 50-disc external output bin
